The Health and Safety Conference Society of Alberta (HSCSA) is a non-profit association comprised of health and safety associations, employer associations and other strategic partners. The purpose of this group is to develop and promote a conference in Alberta dedicated to providing solutions for a healthier and safer workplace.

BOARD OF DIRECTORS

President - Arlene Ledi-Thom Alberta Human Services
Past President - Guy Clyne Manufacturers’ Health & Safety Association
Vice President - Diane Radnoff American Industrial Hygiene Association, Alberta Local Section
Secretary - Dianne Paulson Alberta Construction Safety Association
Treasurer - Jerald Richelhoff Canadian Society of Safety Engineering
Director - Carola von Sass Alberta Forest Products Association
Director - Fred Gould Alberta Motor Transport Association
Director - Jennyfer Harm Alberta Municipal Health & Safety Association
Director - Juanita House Alberta Occupational Health Nurses Association
Director - Hazel Gillis Alberta Safety Council/Safety Services of Alberta
Director - Donald MacDonald Association of Canadian Ergonomists
Director - Kaysha Edwards Canadian Red Cross
Director - Kyla McMullin Enform

St. John Ambulance, Alberta Council
Workers’ Compensation Board - Alberta

On behalf of the Health and Safety Conference Society I am pleased to welcome you, our delegates, trade fair exhibitors, and sponsors to the 12th Annual Health and Safety Conference and Trade fair! Your participation each and every year makes this conference possible and we can't thank-you enough for your continued support.

This year's conference theme is "Own it! Live it". Occupational Health and Safety in the work place is a well-accepted concept. Employers have invested considerable resources in developing and implementing controls and safe work practices for workers. But does health and safety end at the worksite when we leave at the end of the day? No, rather Health and Safety applies to everything we do in our lives be it work or play.

In keeping with this theme we have some exceptional sessions, packed with important information on improving health, safety and environmental issues. Presentations are geared to bring you the most up to date information on new legislation (TAPS), new technology (Nanotechnology) and much more. These sessions and many others will provide you with the important information you need.

I am very thankful to all of our delegates, our conference organizing committee, Conference Coordinator, Sponsors and Exhibitors. Without your support we would not be able to continue on and provide opportunities for learning, encouraging and inspiring ourselves and others in making health, safety and environment first and foremost.

Best regards,

Arlene Ledi-Thom
President
Health & Safety Conference Society of Alberta

Premier of Alberta

Office of the Premier, 307 Legislature Building, Edmonton, Alberta T5K 2B6 Canada

Message from Honourable Alison M. Redford, QC Premier of Alberta

On behalf of the Government of Alberta, it is my pleasure to welcome you to the Alberta Health and Safety Conference and Trade Fair. This is a valuable opportunity for government to meet with our partners in the health and safety industry, and revisit our shared responsibility to ensure Alberta workers return home safely at the end of each day.

Our government is committed to improving working conditions for all Albertans. The Alberta government is committed to improving health and safety and we have demonstrated this commitment with increased funding of \$4.8 million to our Occupational Health and Safety and Employment Standards programs.

This funding will go toward hiring and training more health and safety officers, expanding our partnerships in injury reduction capabilities, developing new health and safety strategies for hazardous industries, increasing our focus on occupational disease prevention and enabling new compliance enforcement measures to improve safety in workplaces. We will also continue to hold accountable those who would risk the well-being of others.

Thank you for supporting these commitments and sharing our goal, and for helping make Alberta the best place in Canada to live, work, and raise a family.

Alison M. Redford, QC

October 21, 2013

ALBERTA

Office of the Minister

Message from the Honourable Dave Hancock, QC Minister of Human Services

On behalf of the Alberta government and my ministry's Safe, Fair and Healthy Workplaces division, it is my pleasure to welcome you to the Alberta Health and Safety Conference and Trade Fair. This is an important time for government and its partners to come together and share ideas that contribute to improving health and safety not only in the workplace, but in our everyday lives.

I am encouraged by the "Own It, Live It" theme of this year's conference – which truly encompasses the far-reaching nature of our efforts to foster a workplace culture that benefits all Albertans.

Efforts to improve the work environment have benefits that reach beyond the workplace – into our homes, our families, and our larger community. This simple, empowering thought is a touchstone of Alberta's Social Policy Framework, and is imbedded in the principle that the well-being of our province is linked to the well-being of individual Albertans, their households and their families.

The greater the effort we make as employers, workers, parents and neighbours to minimize our exposure to risk, and educate ourselves about smart work practices – the greater the reward.

By working together as partners to "own" health and safety practices and to "live" by them in our personal and professional capacities, our communities grow stronger, more supportive, and better able to help those in need.

I hope you enjoy this two-day conference and share what you learn with others. Working together, we can continue building a better, safer and healthier Alberta for all.

MESSAGE FROM WCB-ALBERTA

You are one idea away from making your workplace even safer.

Welcome to the 12th annual Alberta Health and Safety Conference and Trade Fair. This is one of the largest conferences and trade fairs of its kind in Western Canada, and it's getting bigger each year.

Own it. Live it.

For most participants at this year's event, safety is an integral part of our everyday work routine. But we all know that thinking about safety shouldn't stop there. We are challenging you to take it one step further. This year's theme—*Own it! Live it!*—encourages you to incorporate safety into everything you do, not only at work, but also at play.

Over the next two days you will be able to view the newest products and services in the safety, health and environmental industries. You've also been given the opportunity to choose from numerous education sessions, with a variety of topics and speakers focusing on the ever-changing world of health and safety.

Make the most out of this year's event—ask questions, participate in the discussions and share your ideas. After all, it is a great opportunity to come up with additional ways to make your world at work, and at play, even safer.

We appreciate your support and attendance at this year's conference. Thank you for helping make it a success.

Sincerely,

Guy R. Kerr

sponsored by Christensen & McLean Roofing Co.

08:30 - 10:00 am - OPENING KEYNOTE

Session 101 | Palomino C/D
Dr. Mark DeVolder

Get Engaged! The Business of Relationships

See the profound connection between highly motivated employees and increased productivity and profitability. Communicate, innovate, Thrive!

With straight-forward strategies and convincing business examples, Mark shows leaders how to improve the bottom line through the pillars of commitment: clarity, competence, influence and appreciation. You will leave with tools and a template to re-energize, re-engage and transform your workplace and life.

[Break - 10:00 am - 10:15 am - move to next session]

10:15 am - 11:15 am - EDUCATIONAL SESSIONS

Session 102 | Palomino E
Ian Hooper, Alberta Human Services

Partnerships in Injury Reduction

Partnerships in Injury Reduction is a non-regulatory, province wide injury prevention program sponsored cooperatively by government, labour, and industry. The program offers tools to:

- Implement a health and safety management system
- Guidance in applying for a Certificate of Recognition (COR)
- Potential for premium rebates from the Workers' Compensation Board-Alberta

In this session, Ian Hooper, Director of Alberta Human Services, OHS Branch - Partnerships in Injury Reduction, will provide an update and overview of the Partnerships program and its initiatives.

Session 103 | Palomino F
David Antle (sponsored by ACE)

'Participatory Ergonomics' Approaches to Develop Applied Workplace Research and Effective Workplace Interventions.

Participatory Ergonomic (PE) Approaches enhance ergonomic interventions by harnessing employee knowledge, improving communication among stakeholder groups, developing improved buy-in among stakeholders, and developing sustainable capacity. However,

Session 103 - continued

developing PE projects require significant planning and direction, as well as training resources for workplace participants. Recognizing the need for comprehensive PE resources, the SafetyNet Centre for Occupational Health and Safety Research in Newfoundland & Labrador worked to develop a PE tool kit “A Team Approach”. This package includes Promotional Video, Ergonomists Guide, Training Manual and associated Intervention Tools for development of knowledge and skills of Ergonomics Team members. This conference presentation outlines the tool kit and demonstrates the need to partner with other ergonomists to adapt and improve the tools in variety of other working contexts.

Session 104 | Palomino C/D
Dr. Perry Sirota (sponsored by MHSA)

Mental Health in the Workplace

Mental Health in the workplace is attracting unprecedented attention, highlighted by the publication of the first ever Canadian national standard titled “Psychological health and safety in the workplace”, document CAN/CSA-Z1003-13/BNQ 9700-803/2013, National Standard of Canada. About 15% of Canadians will experience a mental disorder each year, depression rates appear to be increasing, and most people at risk are of working age. 30% of disability claims and 70% of disability costs are for mental disorders. It is estimated that the annual cost of mental illness to the Canadian Workplace is \$50 billion. Approximately 500,000 Canadian workers miss work daily due to mental health issues. Not only is mental health highly treatable, accommodations in the workplace are highly effective, cost efficient, and untreated mental illness in the workplace represents a significant health and safety concern.

My presentation will cover the following topics:

- The most common mental health conditions that impact the workplace
- Symptoms associated with these disorders
- Defining and understanding stress
- Warning signs
- Economic and legal factors
- Creating a healthy workplace
- Stigma and the mentally ill worker

Session 105 | Quarter Horse
Diane Radnoff

Exposure to Crystalline Silica at Alberta Work Sites

Exposure to crystalline silica is a hazard common to many industries in Alberta. In 2009, the occupational exposure limit (OEL) for crystalline silica was lowered. Concern was expressed

Session 105 - continued

on the ability of employers to comply with the limit, particularly when exposure limits were adjusted down for work shifts longer than eight hours. Since there was little exposure data available for Alberta work sites, Alberta Human Services initiated a project to identify industries and tasks for which exposure to silica above the OEL is a potential hazard in Alberta and evaluate the controls in place to protect workers. Exposure monitoring was conducted over four years. The results of this work indicate that exposure to crystalline silica is more widespread than initially thought. In many cases where the OEL was exceeded, additional worker groups were exposed as a result of their specific work tasks or due to incidental exposure from other activities at the work site. In addition, many employers have controls in place to protect workers, but these controls are not used to their full potential. Finally, the OEL may not need to be adjusted to protect workers over work shifts longer than eight hours. The lessons learned are that more work is required to raise awareness of the hazard and to develop tools that can be used by employers and workers at the work site to help reduce exposures.

11:15 am - 12:30 pm - LUNCH & TRADE FAIR VIEWING

12:30 pm - 01:30 pm - EDUCATIONAL SESSIONS

Session 106 | Palomino C/D
Sarah Burke & Debby Carreau (sponsored by Canadian Red Cross)

Respect in the Workplace - Why Respect Matters

Not only are costs a significant reason that respect matters in the workplace, employers are also required by the Canadian Human Rights Commission and Canada Labour Code to develop their own harassment policies and provide anti-harassment, bullying and discrimination training. Employers can be held legally responsible for harassment, bullying and discrimination in their workplaces, and unless they can prove that they are making efforts to prevent these occurrences from happening, may well find themselves facing serious financial and legal consequences. This session will explore ways to deal with harmful behaviours such as bullying and harassment in the workplace and look at concrete action steps that are part of a process to reduce the risk of violence and increase protection within the organization.

Session 107 | Quarter Horse**Building Owners and Managers of Alberta - BOMA Partnerships****BOMA - PIR EHS Certificate**

Occupational Health and Safety (Alberta Human Services) and BOMA have been working together to create a new environment, health and safety standards certification.

This joint certificate is designed to recognize building management companies whose managed buildings have reached BOMA's highest level of Building Environmental Standards in Level 4 Certification and where the management companies have also achieved a Certificate of Recognition (COR). The new joint certificate will recognize this significant achievement. This session will provide an overview of the path to achieving this new joint certificate while describing how BOMA BEST Level 4 Standard and the Certificate of Recognition fit together.

Session 108 | Palomino E**Dr. Lisa Ross-Rodriguez (sponsored by Alberta Human Services)****Are there Mega-Risks of Nano-Materials?**

Engineered Nano-materials (ENM) are produced to improve existing technologies and develop new applications for the advancement of many industry sectors, such as energy, medicine, consumer products, agriculture, and manufacturing. The rapid growth of the nanotechnology industry in Alberta brings new challenges to understanding, predicting, and handling potential occupational health and safety (OHS) risks.

This presentation will discuss the current ENM situation in Alberta and discuss recommendations for OHS regarding nanotechnology.

Session 109 | Palomino F**Beverly Lafortune (sponsored by St. John Ambulance)****Saving Lives at Work, Home and Play**

You've been trained and are prepared for emergencies at work but as we know, emergencies aren't scheduled to occur Monday to Friday, 9 to 5.

They can happen at any time, any place. Are you prepared for that? This session will provide participants the opportunity to reflect on their current knowledge and skills and explore strategies to transition their work emergency and First Aid plans for personal use.

01:30 pm - 02:00 pm - COFFEE BREAK & TRADE FAIR VIEWING

**02:00 pm - 03:00 pm - EDUCATIONAL SESSIONS****Session 110 | Palomino C/D****Greg Ford****The Link Between Personality and Human Error**

Studies show that 80-90% of workplace incidents are caused by human error, and more than ever progressive organizations are putting a spotlight on the human aspect of the safety equation. This presentation focuses on the link between personality and high-risk behaviour, due to each person's core default settings of being Impulsive vs. Cautious, Rule-Resistant vs. Compliant, and so on.

The speaker will examine case studies and research findings on how organizations are decreasing incidents, reducing equipment damage, and lowering insurance costs. Specific results include a five times higher workplace incident rate for Impulsive personality types, and a four times higher road-crash rate for Rule Resistant personality types. Attendees will see data and findings from pilot projects with major Canadian corporations (EnCana, Finning, Ledcor, Kiewit Energy Canada, Canadian Freightways, SNC Lavalin, BCAA). This session will demonstrate that it may be possible to predict the probability of unsafe behaviours using ground breaking new employee evaluation techniques and is intended for forward-thinking business leaders who seek continuous improvement and who are open to new ideas.

Session 111 | Quarter Horse**Allan Kehler****Thriving Versus Surviving in the Face of Addiction**

It is important that we approach the area of addictions with understanding and compassion instead of judgment. Allan firmly believes that at the root of addiction lies a living problem that needs to be recognized and healed. The key to moving forward is having the tools to live.

When someone close to you is struggling with addictions, one can feel a sense of hopelessness. At a time when one feels as though everything is out of their own control, Allan can show you the steps to healing. He provides direction on how one can move forward from an unhealthy situation.

In the workplace, increased rates of accidents and injuries, absenteeism, and decreased team morale are all results of addictions. Allan will discuss the signs of addiction, how to approach this sensitive issue, and give the tools of intervention with a proactive approach. You will be taken into the world of an addict while being provided with a deeper understanding. An employer who is willing to take the time to put energy into their employees will benefit from increased productivity, less absenteeism and turnover, and higher team morale overall.

Session 112 | Palomino E**Dave Wojcicki****Worksafe Alberta**

The goal of this project is to renew Work Safe Alberta through the development of a Government of Alberta Strategic Framework. This will align the efforts of the formal Occupational Health and Safety (OHS) branches (Policy, Program Development and Research, Occupational Disease Prevention, Delivery and Partnerships in Injury Reduction), and coordinate related GOA activities that affect health and safety in the workplace, positioning the GOA to better support employers and workers to prevent illnesses, injuries and fatalities at work.

The strategy will be led by OHS with significant input from other ministries to look for opportunities where we can enhance and streamline services through strategic alliances for Albertans.

Session 113 | Palomino F**John Gillespie (sponsored by CSSE)****Incident Investigation — Past, Present and Future**

As we make mistakes and incidents occur we must strive to understand why the incident occurred and how do we ensure it does not happen again. This session will examine when investigations started, how have they changed to the present and what can we expect in the future.

[Break - 03:00 pm - 03:15 pm - move to next session]

**03:15 pm - 04:15 pm - EDUCATIONAL SESSIONS****Session 114 | Palomino F****Faith Wood (sponsored by ACSA)****The Importance of Body Language when Connecting!**

Ever wonder if someone really wants to be in a conversation with you? Could you be unknowingly undermining your relationship efforts with your body language (and theirs)?

As soon as we come into contact with others we are communicating, without having even exchanged one word. For this reason understanding your own body language and having the ability to read the body language of others will play an important part in achieving successful interpersonal communication outcomes.

Session 114 - continued

Learning Outcomes:

1. How to know when someone is interested in you (or not)
2. How proxemics can motivate or repel
3. Body language faux pas that we make which undermine credibility and authority
4. Why the feet might be the most honest part of the human body

Session 115 | Palomino C/D**KEYNOTE PANEL****Canada's Safest Employers – Leadership Panel**

What does it take to become one of Canada's Safest Employers? This panel discussion will feature past and present winners of Canada's Safest Employers Award to share best practices on how to achieve safety culture excellence in your organization.

Attendees will have an opportunity to interact with executives from some of the safest companies in Canada and get their insights on safety leadership and their journey towards achieving success in their workplace and with their people.

Session 116 | Quarter Horse**Cory Johnson****Turning Disabilities into Possibilities**

Cory encourages his audiences to see new possibilities within themselves and others. With his own perception on life, he'll challenge you to remove some of your barriers.

08:30 am - 10:00 am - BLOCKBUSTER SESSIONS

Session 201 | Palomino C/D Judy Croon

Relieving Stress with Humour: Judy's 7 Ingredients for Living Well That Don't Include Tofu

Sharing her hilarious experiences from comedy, radio, keynote speaking and fundraising, Judy shows you how humour and passion - combined with the following seven ingredients - are so powerful, they almost turn you into a Marvel Superhero. Judy talks about:

- a range of the incredible medical benefits of humour;
- how happiness is a mindset;
- how to increase your chances of surviving a heart attack by five times;
- how to increase your lifespan and quality of life by laughing;
- increasing your brain's reasoning and decision making;
- the surprising key to motivation; and
- the most important gift you can give your child.

Judy's 7 Ingredients:

1. Positive Attitude | 2. Perseverance | 3. Forgiveness | 4. Faith
5. Family And Friends | 6. Mental Activity | 7. Physical Activity

Session 202 | Palomino F Shilo Neveu

The Changing of Technological Landscape of OHS: What does this mean for Liability, Risk and Due Diligence?

The overarching premise of this lecture is that the technology train cannot be stopped and organizations will be faced with getting on board or being left behind; so what does this mean for an organization in terms of their liability, risk and due diligence. In this session, Shilo Neveu examines the question of how technology has and will affect an organizations liability, risk and due diligence. The session will begin by examining recent Canadian case law and what the courts are saying about organizations adoption of technology and what that means legally. Further, the session will examine Canadian legislation that may have an impact on technology adoption by an organization. The session will end with practical consideration an organization can take to mitigate negative consequences of technology integration/adoption at the field level. This will include contract considerations, types of technologies to use, training, implementation, and monitoring tips.

10:00 am - 10:45 am - COFFEE BREAK & TRADE FAIR VIEWING

10:45 am - 11:45 am - EDUCATIONAL SESSIONS

Session 203 | Palomino E Sean Kerklaan

Didn't Get Enough Sleep? You Might as Well be Drunk

Sean Kerklaan's presentation will provoke awareness around the issue of fatigue and safety in the workplace. Many individuals, especially shift workers, are affected by sleep problems they don't even know they have. These sleep issues, whether they be due to biological, lifestyle, or work schedule problems, affect their performance at work. In high-risk industries this especially takes a toll as reaction times need to be at their peak, but are not due to fatigue.

Sean will relate fatigue issues to real life examples such as the recent train accident in Quebec City. These examples will show the importance of leveraging actual validated science to demonstrate the real dangers workers are subjecting themselves and innocent bystanders to when they come to work tired. Wearable technology can help prevent these fatigue related accidents in the workplace.

Session 204 | Palomino F Moir Botham/Betty Tobias (sponsored by AIHA)

Differentiating Occupational Hazards from Media Hype

Advances in heavy oil extraction have increased efficiency of resource use and provided more secure energy for our nations' future. Potentially a good news story – however, these advances have received significant negative attention from the global media. This presentation explores the challenges associated with managing occupational health & safety risks within the context of media hype surrounding resource extraction.

Session 205 | Quarter Horse Dr. Michael Alpern (sponsored by The Alberta Safety Council)

JobSafe for Adults

Many adults leave school without completing their formal education. Some leave school without completing the course and credit requirements for a high school diploma. Still others may have never had the opportunity to take a basic workplace-focused safety course. To address the needs of anyone who fits one or more of these descriptors, the Job Safety Skills Society (JSSS) in partnership with the Alberta Distance Learning Centre (ADLC)

Session 205 - continued

have developed and made available to adults their accredited on-line JobSafe courses. The curriculum for these courses was developed by Alberta Education and the OH&S instructional materials which form the content of the courses were developed by the JSSS.

These learning opportunities will be of value to persons of any age entering the workplace for the first time, changing employment, to temporary foreign workers and to many others. This presentation describes the available courses, the focus of each course, how to enrol in courses, and the potential benefits to workers of completing one or more of the JobSafe for Adults courses.

Session 206 | Palomino C/D**Ross Nairne & Rob Feagan****Alberta OHS Ticketing and Administrative Penalty System (TAPS) Update**

A new OHS administrative penalty system is slated to be introduced in the fall of 2013, and new OHS ticketing system in early 2014. These new penalty systems are designed to further motivate those at Alberta workplaces to comply with OHS legislation. The latest information on these initiatives will be provided, along with an update of other OHS initiatives being undertaken by the Government of Alberta.

11:45 am - 01:15 pm - LUNCH & TRADE FAIR VIEWING**01:15 pm - 02:15 pm - EDUCATIONAL SESSIONS****Session 207 | Palomino F****Paulette Handberg (sponsored by WCB)****Prevention First, What Comes Next: Your Next Steps are Crucial for Your Employee and Your Premiums**

Having the right foundation is the first step in becoming a leader in disability management in your industry. In this session you will learn about the best initial response practices used in industry for the most effective claims management. How do the initial choices you make impact your employees' recovery and return to work and how does that impact your premiums? Be the best in injury response and you have achieved the first step in becoming a leader in your industry. Building on this foundation will set the stage for successful long term management of injuries. Key topics for this session would be: Reporting, Injury response, OIS, Modified work, Tools and resources (WCB seminars and tools).

Session 208 | Palomino E**Dave Fennell****Risk Tolerance**

Risk Tolerance or risk 'acceptance' is a factor in 1/3 to 1/2 of all incidents and at risk behaviours. This presentation provides an introduction to the concept of risk tolerance and identifies The 10 Factors for influencing Risk Tolerance that impact personal and group decisions on how much risk is acceptable. For each of the 10 factors, strategies are provided on how to recognize it and how to deal with it using practical approaches. The presentation wraps up with a challenge for all to apply the strategies in the work place and shows how to use common safety tools and approaches to reduce risk acceptance.

Session 209 | Palomino C/D**Gary Phillips****The Investigation Revolution**

Gary Phillips, the author of the Art of Safety, presents insight and exercises from his forthcoming book on investigation and organizational recovery. Find out why investigation is the most important of all safety activities. Discover how accepted models of causation and investigation practice no longer apply. And learn techniques to transform investigations and hasten healthy recovery in any organization.

Session 210 | Quarter Horse Jamie Erickson

Collision Avoidance

In this brief look at Collision Avoidance we will discuss how Collisions occur and steps that can be taken to avoid collisions. Topics to be discussed include Recent Alberta Collision Statistics, the 3 Key Driving Factors, Most common causes of Collisions, The 4 step decision making process when faced with a driving emergency, Perception and reaction Time, Effects of speed on collisions, Dynamics of a Collision and seat belt implications. Attendees will leave with an overall understanding of the frequency, the most common causes of collisions and the best practices and prevention steps to avoid collisions.

[Break - 02:15 pm - 02:30 pm - move to next session]

02:30 pm - 04:00 pm - CLOSING KEYNOTE & CEREMONIES

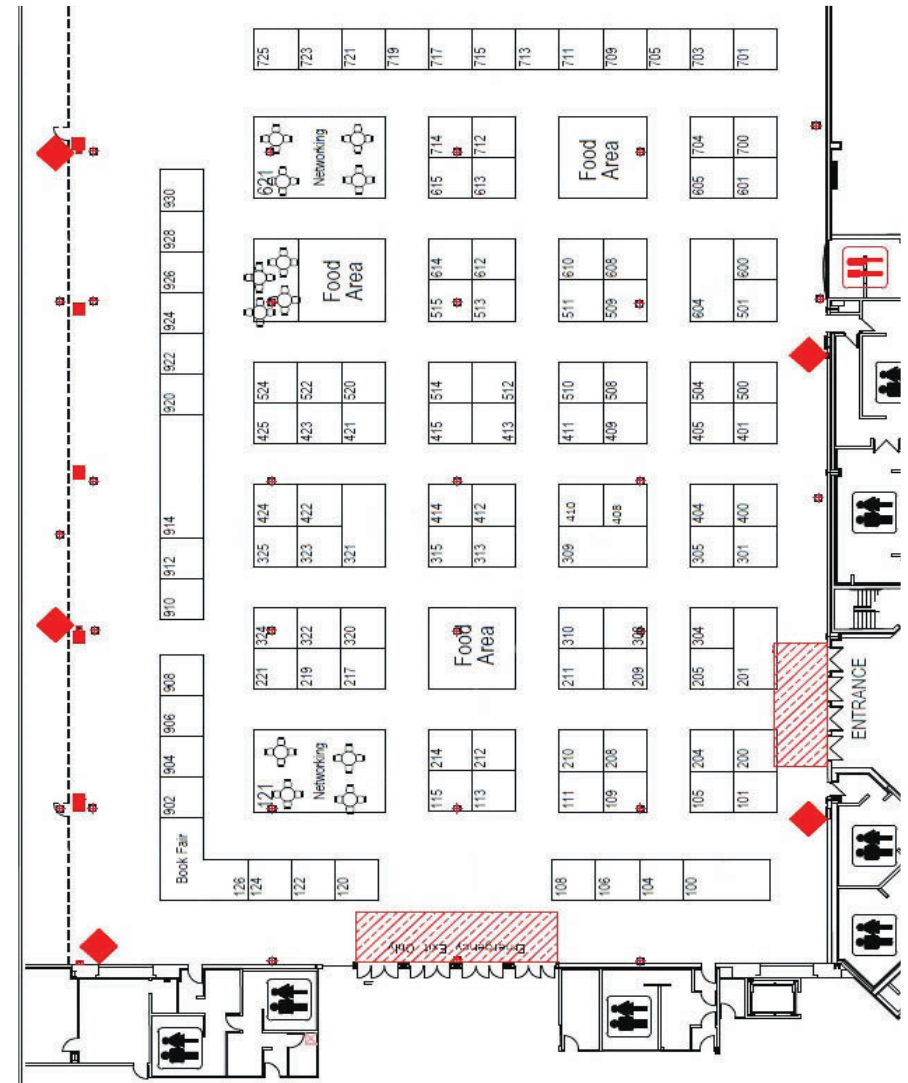

Session 211 | Palomino C/D Linda Edgecombe

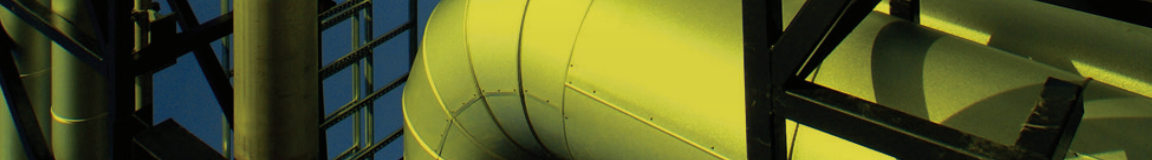

Boost: Powerful Tools to Re-Energize and Re-Engage You and Your Team in Crazy Times

Get ready for an Energy Boost. Through her humorous stories, relevant research and honest questions, Linda works with audiences to deliver strategies and goals for living a more happy and productive life, while increasing successes in your work teams.

You and your team will come away with:

- Key steps to move towards accountable teams and attitudes;
- Keys to creating a healthy 'change resilient' Leaders and Teams;
- A plan for 'shifting perspectives', 'facing your fears' and 'dumping excuses' in the face of change;
- Strategies to live a "Just Do It Plan" versus a "Perfection Plan";
- Strategies to Re-Energize Yourself, Your Team, Your Family.

TRADE FAIR EXHIBITORS - overview

Booth 500	2nd Call - The Next Generation Locating Service	2nd Call® is an internationally trademarked next generation locating service that offers local coverage to customers province wide. The 2nd Call® locating service checks for, locates and identifies all locatable underground facilities and hazards in a dig area in accordance with OH&S code rule Part 32 Section 447 - 1(a), (b), (c) & (d) because only making one call does NOT check for it all.
Booth 425	3C Information Solutions Inc.	3CIS provides online software for managing your safety data. Our product - Incident Check - allows you to track your incidents, near misses, and hazards and quickly generate reports to give you actionable data to keep people safe. Incident Check is available for a low monthly cost, with no contract.
Booth 508	3E Company	3E Company's comprehensive suite of data products and information services enable improved compliance with global Environmental Health & Safety (EH&S) requirements and includes Web-based and integrated global regulatory data; MSDS authoring, distribution and management; transportation; emergency response; training; regulatory reporting; and waste management.
Booth 212	Alberta Association for Safety Partnerships	The AASP offers Certifying Partner services to any company regardless of size or industry type. We have twelve training modules; two examples are Health and Safety Program Development & Auditor Certification (internal and external). Also, check our website to review the requirements to achieve a QSR (Qualified Safety Representative).
Booth 712	Alberta Association of Optometrists	We administer Alberta's largest prescription safety eyewear program. Our non-profit status enables us to offer wholesale pricing to over 300 client companies across all industries. We help to keep safety clearly in sight.
Booth 715	Alberta Construction Safety Association HSCSA Member	Alberta Construction Safety Association (ACSA) is an industry funded and industry driven organization whose Mission is "to provide quality advice and education for the construction industry that will reduce human suffering and financial costs associated with workplace incidents". To achieve its Mission, the ACSA develops programs and offers a wide range of other support services to its members, i.e., administering the Certificate of Recognition program for the construction industry. These top-quality programs and services have proven so successful, the ACSA is recognized as a health and safety leader.

Booth 122	Alberta Human Services HSCSA Member	Alberta Human Services OHS branch - Partnerships in Injury Reduction promotes health and safety through partnerships with safety associations, industry groups, employers, educational institutions and labour organizations. In order to recognize employers who have developed a health and safety management system and met established standards, a Certificate of Recognition (COR) is awarded. Certificates are issued by Alberta Human Services and co-signed by Certifying Partners. Achieving and maintaining a valid COR is required to earn a financial incentive through the WCB's Partnerships in Injury Reduction program.
Booth 908	Alberta Motor Transport Association HSCSA Member	The AMTA represents all sectors of the highway transportation industry. We take a leadership role in enhancing workplace safety and fostering a healthy, vibrant industry. The AMTA is also a Certifying Partner in the Certificate of Recognition program.
Booth 422	Alberta Municipal Health & Safety Association HSCSA Member	The Alberta Municipal Health and Safety Association (AMHSA) is a not-for-profit organization dedicated to helping reduce the human and financial costs resulting from workplace illnesses, injury and property damage. Our mandate is to provide meaningful safety training and education programs to our members in a cost-effective manner.
Booth 108	Alberta Occupational Health Nurses Association HSCSA Member	The Alberta Occupational Health Nurses' Association (AOHNA) is a non-profit organization representing occupational health nurses working in Alberta. <ul style="list-style-type: none"> • The AOHNA is a specialty practice group of the College and Association of Registered Nurses of Alberta (CARNA). • The mandate of the AOHNA is to promote healthy working environments, protect the health of workers, and prevent occupational injuries and illnesses.
Booth 408	Alberta Safety Council HSCSA Member	The Alberta Safety Council (ASC) is a provincial, not-for-profit, charitable organization dedicated to "Making Alberta a Safer Place to Live, Work and Play". We achieve our goals and objectives through educational programs offered across the province in the areas of Public Safety, Workplace Health and Safety and Children's Safety.
Booth 524	Alberta Transportation	Traffic safety information and promotional resources.

TRADE FAIR EXHIBITORS - overview
