**The Health and Safety Conference Society of Alberta (HSCSA)** is a non-profit association comprised of health and safety associations, employer associations and other strategic partners. The purpose of this group is to develop and promote a conference in Alberta dedicated to providing solutions for a healthier and safer workplace.

## BOARD OF DIRECTORS

**President - Guy Clyne**  
Manufacturers' Health & Safety Association

**Past President - Laurie Billings**  
Alberta Safety Council

**Vice President - Arlene Ledi-Thom**  
Alberta Human Services

**Secretary - Dianne Paulson**  
Alberta Construction Safety Association

**Treasurer - Jerald Richelhoff**  
Canadian Society of Safety Engineering

**Director - Susanne L'Heureux**  
Alberta Municipal Health & Safety Association

**Director - Kaysha Edwards**  
Canadian Red Cross

**Director - Corinne Paul**  
Enform

**Director - Diane Radnoff**  
American Industrial Hygiene Association, Alberta Local Section

**Director - Fred Gould**  
Alberta Motor Transport Association

**Director - Dianne Szlabey**  
St. John Ambulance

**Director - Kim Zapf**  
Workers' Compensation Board - Alberta

**Honorary Lifetime Director - Ed Corson**

**Conference Coordinator - Tonya Toope**

Workers' Compensation Board - Alberta

### *Welcome to the 11th Annual Alberta Health and Safety Conference and Trade Fair.*

On behalf of the conference organizing committee I am honoured to welcome our sponsors, trade fair exhibitors and especially all delegates. We are very excited to once again provide a venue to further promote health and safety in the workplace through blockbuster sessions, educational sessions and one of the largest health & safety trade fairs in Western Canada.

This year's theme is "Health & Safety - Transitioning to the Future". As we all know, the workplace can be an ever changing environment. Combine that with an increasing desire to improve health and safety within those environments and it makes for an exciting and important time for workplace health and safety.

In between the opening keynote address, titled "Leading the Generations: Adjusting Attitudes in the Multigenerational Workplace" and the closing keynote, titled "Safety Counts Because Everyone Counts", there are over twenty other exceptional sessions, packed full of information and presented by excellent speakers. All of which are designed to assist in improving health, safety and environment issues within the workplace.

We encourage all delegates to take full advantage of the conference by attending sessions and between sessions, to visit the Trade Fair to see all that our exhibitors have to offer. From new and innovative products and services to what are the latest trends and developments in the health, safety and environment industry.

Finally, a huge thank you to all our sponsors, trade fair exhibitors, and delegates for supporting our conference and providing us with the opportunity to further promote workplace health and safety. I also want to thank the dedicated and hardworking conference committee for their tireless efforts in ensuring the conference is a success.

Best regards,

A handwritten signature in black ink that reads "Guy Clyne". The signature is fluid and cursive.

Guy Clyne, President  
Health & Safety Conference Society of Alberta

As Minister of Human Services, one of my top priorities is to ensure Albertans have safe and healthy workplaces. I'm pleased to recognize the Alberta Health and Safety Conference and Trade Fair for sharing in and working towards this priority for the past 11 years.

This year's conference theme, **Health & Safety - Transitioning to the Future**, provides a great opportunity to recognize and reflect on your accomplishments. Although there is much room for improvement, we have come a long way in creating the conditions for better workplace health and safety.

Together, we continue to make positive strides in preventing workplace injuries, diseases and fatalities. Health and safety is everyone's responsibility; employers, workers, safety associations, labour groups and government. By building strong, collaborative relationships, we can work together to ensure Alberta's workers return home to their families, healthy and safe, at the end of the day.

Your efforts have had a very positive influence on the culture of workplace health and safety in Alberta. Just like seat belts in cars, or bike helmets for our children, we are consistently edging closer to a better understanding that working in an unhealthy or unsafe environment is not acceptable. Your conference and the efforts you put forth are instrumental in creating this culture, continuing to build on it, and ensuring it remains top of mind. Alberta's workers and their families thank you.

Dave Hancock, QC  
Minister

A large, stylized handwritten signature in black ink, which appears to read 'D. Hancock'.

Alberta

For the people attending this year's conference and trade fair, health and safety is much more than a catchy slogan on a T-shirt or a pen. It is a vision, an unwavering commitment to making Alberta's workplaces even safer. It is also a commitment to helping injured workers get back to work safely when accidents do happen.

Health and safety is a topic that touches every generation in the workforce—from the young worker just starting his or her first job to the older worker looking forward to retirement. Health and safety has no age restrictions, and it affects every job in every industry. It is everyone's business.

For the last 11 years the Alberta Health and Safety Conference and Trade Fair has set the stage for professionals to meet with other like-minded individuals to discuss the growing trends and topics in the ever-changing safety field.

This year is no exception. You will find an even wider range of educational topics and key-note speakers with over 30 education sessions available to participants, as well as a diverse showcase of exhibitors as part of the trade fair. It is easy to see why this annual conference is quickly becoming the largest event of its kind in Western Canada, dedicated to promoting advances in the health, safety and environmental industries.

Thank you for participating in this year's conference and helping make it a success.

Sincerely,

A stylized, handwritten signature in black ink, consisting of several fluid, overlapping strokes.

Guy R. Kerr  
President and CEO

The 11th Annual Alberta Health & Safety Conference and Trade Fair could not be possible without the continued support of the many companies who have graciously sponsored the event. Our sponsors are key in providing a successful annual conference and we appreciate them tremendously.

## OPENING KEYNOTE

---

01:00 pm - 2:30 pm

**Session 101** | Michelle Ray

**HALL C**

### **Leading The Generations: Adjusting Attitudes In The Multigenerational Workplace**

The notion of having one job and having it for life does not hold any appeal for the new generation of workers. Those days are gone forever and unless organizations are willing to invest in their people emotionally and financially, the best and brightest will unashamedly seek opportunities elsewhere, leaving you scrambling to replace them. In this context, employers must be willing to rethink existing hiring, mentoring and training practices and let go of old ideas that shaped the traditional organizational structures.

In this fun and informative presentation, participants learn how to adjust attitudes regarding the secret to motivating and retaining our workforce to create outstanding inter-generational workplaces. Despite the volatility of the economy and the job market, we can develop an outstanding workplace culture by focusing on what is within our control. Developing an unbiased viewpoint and flexible approach, coupled with exceptional interpersonal skills and specific methods to keep all team members engaged, productive and satisfied. These are fundamentals for leadership success in managing our diverse workforce.

## EDUCATIONAL SESSIONS

---

2:45 pm - 3:45 pm

**Session 102** | Rob Feagan, Alberta Human Services

**Salon 10**

### **Partnerships In Injury Reduction**

Partnerships in Injury Reduction is a non-regulatory, province-wide Injury prevention program sponsored cooperatively by government, labour and industry.

The program offers tools to:

- Implement a health and safety management system
- Guidance in applying for a Certificate of Recognition (COR)
- Potential for premium rebates from the Workers' Compensation Board-Alberta

In this session, Rob Feagan, Director of Alberta Human Services OHS Branch - Partnerships In Injury Reduction will provide an update and overview of the Partnerships program and its initiatives.

### **Session 103** | Corinne Paul, Enform

#### **Salon 9**

### **Controlling Chemical Hazards - The Future**

The issue of hazard versus risk will be explored comparing what it means to assess and control hazards and what it means to assess and manage risk. A case-based approach will be used and examples of real-world hazards and risks will be introduced.

### **Session 104** | Phillip Ragain, The RAD Group

#### **Salon 8**

### **Human Intervention: A Dynamic Solution To Complex Safety Problems**

Human factors research indicates that incidents occur in complex environments, which means that mechanical and procedural safeguards inherently insufficient. Frontline employees are uniquely suited to function as a dynamic barrier against incidents in these complex environments. New research shows that the key is to enable those employees intervene more effectively.

## **COFFEE BREAK IN TRADE FAIR AREA**

**3:45 pm - 4:15 pm**

## EDUCATIONAL SESSIONS

---

**4:15 pm - 5:15 pm**

**Session 105** | Erin McFadden, Workers' Compensation Board  
**Salon 10**

### **Return to Work Action Plans: How to Effectively Manage Return to Work and your WCB Premiums**

This seminar will help you to pro-actively identify gaps in your disability management program, and to understand how to assess opportunities to maximize return-to-work outcomes for your employees - thus allowing you to pay the best WCB premiums.

Through attending this seminar you will learn how to set goals and targets for your organization that will allow you to minimize the impact of workplace injuries on both your employees and your costs.

**Session 106** | Cindy Messaros, Paul Holmes & Emil Tarka, Alberta  
**Salon 9** Workforce Essential Skills

### **The Building on Investment Project**

The Building on Investment Project was an initiative that developed a safety talk training program aimed at small and medium sized companies which employ newcomers to Canada. The program includes a Presenter Manual, a Participant Manual, and a Self-Guided manual.

During the development of these materials, employers requested workplace resources to assist native-speakers of English (L1s) to work more effectively with recent immigrants who originate from other cultures and whose first language was not English (L2s). A second set of resources for employers working in culturally-diverse organizations was developed.

This presentation will highlight how employers can fully integrate ESL workers and individuals with low literacy levels into their company's safety culture.

**Session 107** | Dr. Don Melnychuk, Chartered Psychologist  
**Salon 8****Best Practices for Fatigue Risk Management**

Human fatigue is recognized as being one of the primary causes of accidents in the industrial sector. The costs of fatigue are a major human and financial burden to companies, workers, and their families. This session presents some of the key issues concerning employee fatigue and will also identify resources for managing fatigue. It will answer the following questions: What is fatigue? What variables impact fatigue? What are the consequences of fatigue? How do you overcome fatigue? This session would fit really well into a Safety meeting format.

Let Dr. Melnychuk, a nationally recognized speaker who has worked with thousands of men and women across Canada introduce you to some of the new developments in the area of fatigue risk management.

You will learn to:

- Define fatigue and recognize the signs and symptoms of fatigue.
- Understand the biology of sleep and circadian rhythms.
- Get higher quality sleep.
- Assess and reduce the impact of the contributing factors to fatigue.
- Develop ways to monitor energy and tension.
- Make food choices that provide the required energy.
- Discover the health benefits of regular physical activity.
- Build family, social, and recreational time.

**WELCOME RECEPTION IN TRADE FAIR AREA****5:15 pm - 6:30 pm**

## COFFEE IN TRADE FAIR AREA

---

8:00 am - 8:30 am

## BLOCK BUSTER SESSIONS

---

8:30 am - 10:00 am

**Session 201** | Dr. Mario Trono

**Salon 8**

### Health & Safety on TV, in the Movies and in the News

This talk explains how media portrayals of health and safety issues can powerfully shape political and public support for people and organizations concerned about H & S. Analysis and discussion will accompany several written, photographic, and video examples of media handling of this issue.

**Session 202** | Isabelle St-Jean, Inspired Momentum Development

**Salon 10**

### What's Next: Charting Your Way to a Purposeful Retirement

Did you know that financial security is only one of 10 success factors of a fulfilling retirement? If you are within a few years of retiring, come and join Certified Retirement Coach and author Isabelle St-Jean for this dynamic session in which she will explain what you must thoughtfully consider so you don't merely "retire" but re-engage in a joyful and purposeful way of life. This session includes tools to assess your readiness, how to avoid the pitfalls of this major life transition, how to re-ignite passions, embrace a new purpose and redefine your personal identity as distinct from your professional role. You will leave inspired, with more clarity, fresh insights, invaluable information and renewed motivation to make the most of your remaining time at work while planning a wise course of action on the way to your best future.

## COFFEE BREAK IN TRADE FAIR AREA

---

10:00 am - 10:45 am

## EDUCATIONAL SESSIONS

---

10:45 am - 11:45 am

**Session 203** | Tom Goldrup, Hinton Pulp

Salon 9

### Confined Space Management in the Digital Age

Remote confined space monitoring is a process of managing long duration jobs within a confined space using existing and new and emerging technology that is safer and more cost effective than the traditional approach.

**Session 204** | Kevin Smadis, Mark Rice, Kenn Hample,

Salon 8 Alberta Human Services

### Not Complying with OHS Rules Can Be Costly!

Hear an Alberta OHS team (Kevin Smadis, Mark Rice, Kenn Hample) describe the development and implementation of two more enhancements in Alberta's on-going evolution of encouraging increased compliance with OHS legal requirements:

1. On-the-Spot Ticketing
2. Administrative Penalties

**Session 205** | Melanie Walls, Human Factors at Work

Salon 10

### Bribery and Corruption - Should we be rewarding safety behaviour?

If you want to improve safety, an obvious place to start is encouraging safety behaviour. This often translates into rewards for behaviours such as wearing personal protective equipment, or for low incident rates. However, there is research evidence that in some

cases giving rewards can have a negative impact on safety, and may decrease proactive behaviour. This presentation will help you to answer key questions about rewarding safety. Should you reward it at all? What form should rewards take? Who should make the decision about rewards? Should they be large or small? You will finish with a solid understanding of the important factors, which you can use to ensure your organization is making the right choices.

**Session 206** | George Billings, Alberta Safety Council

**Salon 11**

### **Our Aging Driver Workforce... Change begins in your 30's**

As our workforce ages, it is important to remember that... With Aging Comes Change. Driving is a large portion of the work task for many people employed in Alberta and across Canada. Research has proven that as we age, physical and physiological changes take place that impact the driving task. You don't have to be 50 or 60 to begin experiencing these changes... some begin in our 30's. Join us to discuss the types of change that take place, when they begin to take place and what we, as company representatives, should be doing to ensure drivers are adjusting their driving habits in an effort to continue to do their job safely.

## **LUNCH IN TRADE FAIR AREA**

---

**11:45 am - 1:15 pm**

## **KEYNOTE SESSION**

---

**1:15 pm - 2:30 pm**

**Session 207** | Alexandra Samuel

**Salon 8**

### **Social Media in 3 Hours a Week: Starting and Growing an Online Presence**

"If you build it, they will come" may work in baseball, but it's almost guaranteed to strike out online. Attracting visitors and turning them into passionate, recurring contributors-

--and customers--takes careful planning and a skilled hand. That means planning for engagement: understanding what users want, what motivates them to participate, and what success really looks like. But, too often, the sheer volume of choices and platforms can overwhelm. In this fantastic talk, Alexandra shows how, with literally three hours a week, any group can build a robust social media presence. She'll immerse the audience in jump-starting community engagement by simulating the best practices in online community promotions. Participants will gain the skills they need to start, grow, or maintain their ever-important online presence--so they launch not just a site, but a community alive with conversation and collaboration.

## COFFEE BREAK IN TRADE FAIR AREA

---

**2:30 pm - 3:15 pm**

## EDUCATIONAL SESSIONS

---

**3:15 pm - 4:15 pm**

**Session 208** | Jeremy Beach, University of Alberta

**Salon 9**

### **Shifting patterns of employment in Alberta: Are we exposing mothers and their babies to risk?**

In Alberta, a shortage of skilled trades-people has resulted in increasing numbers of women undertaking apprenticeships in non-traditional trades. At the request of the Canadian Standards Association (CSA) technical committee on Safely in Welding we are undertaking a study to compare the outcome of pregnancy in female welders and a referent group of female electricians and to see whether pregnancy outcomes, or the incidence of occupationally related symptoms, are related to job exposures or ergonomic demands.

Following pilot work to develop and validate exposure questionnaires, the WHAT-ME study (Women's Health in Apprenticeship Trades – Metal workers and Electricians) began recruiting tradeswomen in Alberta in January 2011. All women known to have been in apprenticeship training in the selected trades in the last 5 years were approached through Alberta Apprenticeship and Industry Training and asked to return a consent form. Those wishing to take part completed a baseline form on line or by telephone interview and a follow-up form every 6 months. Those who became pregnant returned a urine sample by

mail to assess metal exposures: they also completed three pregnancy questionnaires (at 3 months, six months and post delivery).

In the first wave of recruiting, 250 women from Alberta completed the baseline questionnaire, 144 metal workers (welders, boiler makers or pipefitters) and 106 electricians. Welders and electricians had the same mean age (32 years) and BMI (26): welders were somewhat less likely to complete high school (80%) than electricians (88%). Half the women had had at least one pregnancy by the time of the baseline questionnaire, with 8.3% of welders but only 2.3% of electricians reporting that they had at some point sought medical help for infertility. Since completing the baseline survey 33 women had reported at least one pregnancy. Urine samples from these women, collected in early pregnancy, indicated a slightly higher proportion of samples in welders (44%) than electricians (38%) with one or more metals with concentrations above the laboratory norms. Among occupationally related symptoms only low back pain differed between the trades, being reported more frequently by electricians (36.2%) than welders (24.3%).

## TRADE FAIR VIEWING

---

**4:15 pm - 5:00 pm**

## CANADIAN SOCIETY OF SAFETY ENGINEERING - Alberta, NWT & Nunavut Region -

---

**4:30 pm • ANNUAL GENERAL MEETING • Salon 9**

## COFFEE IN TRADE FAIR AREA

---

8:00 am - 8:30 am

## BLOCKBUSTER SESSION

---

8:30 am - 9:45 am

**Session 301** | Audrey Dean, Alberta Human Rights Commission

**Salon 10**

### The Responsibility of the Employer and Employee in Accommodation

This session will cover the requirements for employers to provide accommodation to workers where safety sensitive issues are present. This will include the employer's need for medical information and when a worker must provide it.

**Session 302** | Mark Greene, Alberta Justice & Mulford Clark.

**Salon 8** FMC Consulting Inc.

### The Profession of Saving Lives: Examining the Ethical and Legal Obligations of Being a Safety Professional

As a Safety Professional, you are obligated to adhere to a Code of Ethics aimed at ensuring professionalism, high standards, and continuous learning to create the healthiest and safest workplaces in the world. As well, Safety Professionals have obligations to adhere to legal requirements. When a Safety Professional fails to meet either ethical or legal obligations, there are consequences.

This Session will:

- explain the Board of Canadian Registered Safety Professional's (BCRSP) Code of Ethics;
- review the relevance of having a code of ethics and discuss some of the key elements in establishing and maintaining a code of ethics for safety professionals;

- set out the consequences for breaching the Code of Ethics and the internal disciplinary process of the BCRSP;
- explain the legal obligations of a Safety Professional, consequences of non-compliance, and strategies to mitigate your liability; and
- reflect on recent prosecutions and legal actions against Safety Professionals.

## COFFEE BREAK IN TRADE FAIR AREA

---

9:45 am - 10:15 am

## EDUCATIONAL SESSIONS

---

10:15 am - 11:15 am

**Session 303** | Lisa Chen, Alberta Human Services

**Salon 8**

### WorkSafe Re-Booted

Work Safe Alberta is being reinvented for 2013 as a Government of Alberta (GOA) strategy that will align the occupational health and safety programs and coordinate GOA activities that affect health and safety in the workplace. It will position the GOA to better support employers and workers to prevent illnesses, injuries and fatalities at work.

WSA originated in 2000 in response to the increase in the workers' compensation lost-time claim rate. The strategy debuted in 2002 as a joint industry-labour-government initiative and injury rates have dropped. However, to see further improvements we need to change our approach. We are broadening the scope by seeking more input within the GOA as well as our external stakeholders – workers, employers, labour, post-secondary institutions, safety and industry associations, and the public.

**Session 304** | Dr. Abderrachid Zitouni, PhD., Environmental  
**Salon 9** Health Services/BCCDC Solutions Inc.

### Exposure to Radiofrequency Electromagnetic Fields (EMF-RF) and Protective Measures

Radiofrequency electromagnetic fields are part of non-ionizing radiation, i.e. they do not carry sufficient energy to extract electrons from atoms. The radiofrequency waves are generated and detected/measured by special antennas.

The frequency range of RF waves extends from 3 kHz to 300 GHz. Radiofrequency devices are extensively used for domestic, medical, research, and industrial purposes. The exposure levels due to different devices vary in terms of frequency, power output, type of modulation, distance from the antenna, etc...

This presentation includes the following parts:

- Fundamentals of electromagnetic waves: generation and detection, physical characteristics, propagation, RF quantities and units...
- Review of the different RF devices and their characteristics.
- Comparison of the exposure levels from different devices.
- Canadian and international safety guidelines: Health Canada Safety Code 6, ICNIRP\* guidelines.
- Comparison of exposure limits from different countries.
- Protective measures to limit exposure to radiofrequency waves.

**Session 305** | Dan Demers, CANNAMM Occupational  
**Salon 10** Testing Services

### Medical Fitness, How Employers Today are Saving Lives

Attend this session for an overview of why employers today, who are not required to, are turning to medical testing to address employee fitness in safety sensitive roles. The presentation will cover a wide variety of topics such as the purpose and scope of medical testing, managing confidential medical information and what happens when medical problems are discovered. This presentation is geared toward employers who are interested in the short and long term health of their workforce, have legislative requirements for medical testing and are unsure about the confidentiality level of their existing program.

## EDUCATIONAL SESSIONS

---

**11:30 am - 12:30 pm**

**Session 306** | Marshall Ennis

**Salon 10**

### **Strong in Body - Stronger in Mind**

As an international strength athlete and a powerful entertainer, Marshall has hosted, produced, and competed in international strength events from Las Vegas, USA to Dubai, Saudi Arabia.

One of Marshall's proudest accomplishments has been to create, host and produce the first international Strongman television series viewed around the world by millions of people which shows his personal desire to reach his uncapped potential.

As a strong motivational keynote speaker, Marshall's, customized, multi-media motivational keynotes are a complete way to show you the tools of linking the body and mind to conquer any challenge in your path in the safety world. As individuals and teams you have the tools to "get the job done", Marshall shares with you how to become the strongest in the safety professional role with humor and personal experiences.

**Session 307** | Kim Headrick, Health Canada

**Salon 9**

### **WHMIS 2.1**

The Workplace Hazardous Materials Information System has been in place in Canada since the late 1980s. Within the next three years, this system will have a major overhaul to be in step with the Globally Harmonized System of Classification and labeling of Chemicals (GHS). In this session, a summary will be provided on the proposed changes to the federal and provincial legislation as well as how this new program will be rolled out in Canada.

**Session 308** | Marlynn Kennedy, Alberta Health Services

**Salon 8**

### Partnerships in Workplace Health Improvement

The Alberta Health Services (AHS) Workplace Health team is excited to introduce the Workplace Health Improvement Project (WHIP). This project aims to improve the health of Alberta's workforce by enhancing employer efforts in planning and operating effective workplace health programs, and is a collaborative effort between AHS, government and industry partners. During the presentation coordinators of the project will share best-practices for workplace health improvement, lessons-learned during the development and implementation of this project, and provide participants of the session with practical tools and suggestions for workplace health improvement.

### LUNCH IN TRADE FAIR AREA

Salon 8 | Alvin Law

### Safety Counts Because Everybody Counts

Alvin Law has been challenging perceptions and attitudes his entire life. He is actually one of Canada's first "Thalidomide Babies". This description was tied to a drug from the early 1960's used to treat morning-sickness in expectant women. The drug company claimed it was safe; the testing process was almost non-existent; and the result was thousands of lives irreversibly damaged by something that could have easily been prevented. But that was then.

Focus on safety in the workplace has been around a long time but it still faces resistance by some workers as being a "waste of time" or something else cooked up by the human resources department to get in the way of my job.

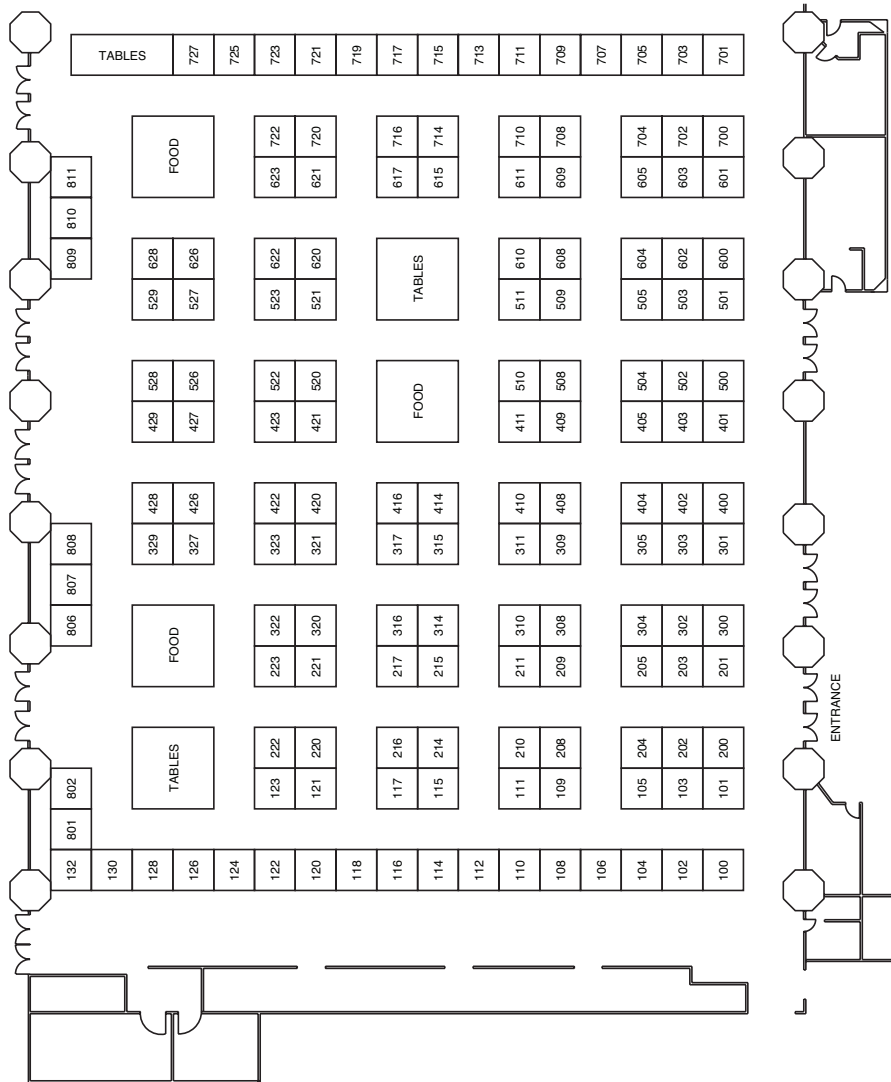

Well, if you ask Alvin Law, maybe the Good Old Days weren't really so good. We live in a new and uncharted world where things like our attitude towards our job really matters and Alvin Law should know. He may not be a safety expert but he is certified in life, one that hasn't always been easy.

Bring your completed Conference Evaluation Form  
to the Closing Ceremonies and be entered for the

Booth 103	<b>3C Information Solutions Inc.</b>  10366 - 65 Avenue Edmonton Alberta T6H 1T9 (780) 433-3752	3CIS provides online software for managing your safety data. Our product - Incident Check - allows you to track your incidents, near misses, and hazards and quickly generate reports to give you actionable data to keep people safe. Incident Check is available for a low monthly cost, with no contract.
Booth 610	<b>3E Company</b>  1905 Ashton Avenue Carlsbad California 92008 (760) 930-6619 <a href="http://www.3ecompany.com">www.3ecompany.com</a>	3E Company's comprehensive suite of data products and information services enable improved compliance with global Environmental Health & Safety (EH&S) requirements and includes Web-based and integrated global regulatory data; MSDS authoring, distribution and management; transportation; emergency response; training; regulatory reporting; and waste management.
Booth 116/118/120	<b>Activa Health Centre, Chiropractic and Massage</b>  150, 10403 - 122 Street Edmonton Alberta (780)-702-3788	Come visit our booth and sign up for a massage!
Booth 329	<b>Alberta Association for Safety Partnerships</b>  5217D - 50 Avenue Taber Alberta T1G 1V4 (403) 223-9008 <a href="http://www.safetypartnershipsaaasp.com">www.safetypartnershipsaaasp.com</a>	The AASP offers Certifying Partner services to any company regardless of size or industry type. We have twelve training modules; two examples are Health and Safety Program Development & Auditor Certification (internal and external). Also, check our website to review the requirements to achieve a QSR (Qualified Safety Representative).
Booth 527	<b>Alberta Association of Optometrists</b>  100, 8407 - Argyll Road Edmonton Alberta T6C 4B2 (780)-451-6824 <a href="http://www.optometrists.ab.ca">www.optometrists.ab.ca</a>	The AB Association of Optometrists administers a prescription safety eyewear program for more than 300 companies across Alberta. With over 400 participating optometrists in 83 communities, plus wholesale pricing on lens & frame products such as Wiley-X, On-Guard and UVEX, we have been the benchmark program in Canada for over 40 years. . . Your Safety Eyewear Program
Booth 106	<b>Alberta Construction Safety Association</b> <b>HSCSA Member</b>  #101, 225 Parsons Road SW Edmonton Alberta T6X 0W6 (780) 453-3311 <a href="http://www.acsa-safety.org">www.acsa-safety.org</a>	Alberta Construction Safety Association (ACSA) is an industry funded and industry driven organization whose Mission is "to provide quality advice and education for the construction industry that will reduce human suffering and financial costs associated with workplace incidents". To achieve its Mission, the ACSA develops programs and offers a wide range of other support services to its members, i.e., administering the Certificate of Recognition program for the construction industry. These top-quality programs and services have proven so successful, the ACSA is recognized as a health and safety leader.

Booth 423	<b>Alberta Health Services</b> 2210 - 2nd Street SW Calgary Alberta T2S 3C3 (403) 476-2444	Alberta Health Services (AHS) and its partners began the "Be Sunsible" initiative to support employers who aspire to reduce the impact that solar ultraviolet radiation (UVR) exposure has on their workers. The "be Sunsible" initiative strives to increase the recognition of UVR as an occupational hazard and ultimately reduce the incidence of skin cancer among outdoor workers. The role of AHS in this initiative is to provide expertise, leadership and facilitate the process that employers should follow to successfully implement skin cancer prevention initiatives in the workplace.
Booth 321	<b>Alberta Health Services Business &amp; Industry Clinic</b> 11333 - 106 Street Grande Prairie Alberta T8V 6T7 (780)-538-5210 <a href="http://www.albertahealthservices.ca">www.albertahealthservices.ca</a>	The Business & Industry Clinic is a specialized addictions treatment clinic for employees experiencing serious difficulties resulting from use of alcohol and other drugs. It provides a professional treatment option for employers who wish to help a worker become a healthy, safe and productive employee.
Booth 112	<b>Alberta Human Services</b> <b>HSCSA Member</b> 10808 - 99 Avenue Edmonton Alberta T5K 0G5 (403) 355-4178 <a href="http://www.employment.ab.ca/whs-partnerships">www.employment.ab.ca/whs-partnerships</a>	Partnerships in Injury Reduction promotes health and safety through partnerships with safety associations, industry groups, employers, educational institutions and labour organizations. In order to recognize employers who have developed a health and safety management system and met established standards, a Certificate of Recognition (COR) is awarded. Certificates are issued by Alberta Human Services and co-signed by Certifying Partners. Achieving and maintaining a valid COR is required to earn a financial incentive through the WCB's Partnerships In Injury Reduction program.

## Thanks...

to all of those who participated in this year's special event, the Yoga class.

Proceeds of this special event will be donated to Threads of Life, an organization whose mission is to help families heal through a community of support and promote the elimination of life-altering workplace injuries, illnesses and deaths.

## PHOTO RELEASE

Please note that by entering the educational sessions or trade fair, you give the Health and Safety Conference Society of Alberta (HSCSA) permission to use photos taken of you participating in the Health and Safety Conference or Trade Fair, for the purpose of promoting the conference. Some photos may be close-ups and others may be from a distance. Promotion of the tradeshow may include brochures, posters, the HSCSA website and other media.

If you do not want your photo included in any of the Conference's promotional material, please request that the photographer delete the particular photo immediately. Otherwise, it is implied that you do give permission for your photo to be used to promote the HSCSA conference.
