The Health and Safety Conference Society of Alberta (HSCSA) is a non-profit association comprised of health and safety associations, employer associations and other strategic partners. The purpose of this group is to develop and promote a conference in Alberta dedicated to providing solutions for a healthier and safer workplace.

BOARD OF DIRECTORS

President - Laurie Billings
Alberta Safety Council

Past President - Diane Radnoff
American Industrial Hygiene Association,
Alberta Local

Vice President - Guy Clyne
Manufacturers' Health & Safety
Association

Secretary - Dianne Paulson
Alberta Construction Safety Association

Treasurer - Jerald Richelhoff

Welcome to the 10th Annual Alberta Health and Safety Conference and Trade Fair.

We are pleased that you, the delegates, are able to join us to learn, network and lay the groundwork to potentially improve your workplace! On behalf of the conference organizing committee, I am especially pleased to welcome our sponsors and trade fair exhibitors who help make this conference possible and bring us new and innovative information and products.

The year 2011 marks our 10-year Anniversary and now more than ever it is apparent that our Health and Safety Conference, that brings together first rate speakers on timely, important topics, is needed in Western Canada.

Our Conference theme "10 Years and Building" reminds us that we need to learn from the past and look and plan for the future in our industries. We face an ever-changing workplace environment and only our knowledge and insight will help us continue to reduce work-related incidents, illness, injuries and death.

In keeping with the theme of the conference, we have some retrospective sessions as well as a stream of presentations bringing you the most up-to-date information on emerging issues and new legislation, like distracted driving, Ergonomics and the Aging Population and Social Media & Mobile Technologies to safety. These sessions and many others will provide you with important information and some how-to's for improving health, safety and wellness in your workplace.

I am very grateful to all our delegates, our Conference Committee and Coordinator, as well as our Sponsors and the Exhibitors. Without all of you, we would not be able to provide a place and time each year when we can learn, be encouraged, inspire others as we further ourselves and our organizations in our pursuit of health and safety.

Best regards,

President
Health & Safety Conference Society of Alberta

A Message From Mayor Nenshi

On behalf of my City Council colleagues and the citizens of Calgary, it is my pleasure to welcome you to the 10th Annual Alberta Health & Safety Conference and Trade Fair. Employers are constantly striving to provide a safe workplace for their employees. Over the years, technology has allowed industry practices to evolve to make it easier for employers to meet these challenges. The Health & Safety Conference and Trade Fair is an opportunity for professionals in this field to learn about the best practices to keep our workers safe.

The Health & Safety Conference has put together a very educational program with more than 30 sessions to choose from. Over 130 exhibitors will be demonstrating their products and services in the Trade Fair. No matter what industry you come from, you are sure to find something topical and relevant to your particular needs. I commend the Health & Safety Conference Society of Alberta for all of their work promoting the importance of health and safety in the workplace. Your efforts are appreciated.

Sincerely,

Naheed K. Nenshi
Mayor, City of Calgary

Welcome to the 10th annual Alberta Health and Safety Conference and Trade Fair.

Congratulations to the Society for 10 years of informative and educational conferences. You should be proud of the hard work and dedication you've put into making this a successful event.

Much has changed since this conference was first put together a decade ago. We've faced challenges – a volatile economy, a changing workforce. But we've also made strides in innovation, in technology and in safety.

In the last 10 years, the workers' compensation system has grown to cover over 1.7 million workers and more than 139,000 employers. What's more, over that same period, the rate of time loss claims has decreased from 3.1 per 100 workers to 1.5 – an indicator that our commitment to safety and proactive disability management are making a difference in this province. However, we are constantly challenged to not only remain committed, but to continually improve. That is why we need forums like this one.

This conference has been a touchstone through this changing landscape—a way for people with the same vision to have important discussions about how to make our workplaces safe. This anniversary marks not only a time to celebrate, but also to reflect on how far we've come and how far we can go if we all keep working together.

That's what this whole conference is about – working together to ensure a safe and bright future for workers and employers in Alberta. My hope is that everyone takes this opportunity to discuss, learn and grow as professionals in the safety field.

Thank you for taking the time out of your busy lives to participate in this year's conference.

Sincerely,

Guy R. Kerr
President & CEO
Workers' Compensation Board - Alberta

10th Annual Alberta Health & Safety Conference and Trade Fair

could not be possible without the continued support of the many companies who have graciously sponsored the event. Our sponsors are key in providing a successful annual conference and we appreciate them tremendously.

INSPIRING WORKPLACES: Creating The Kind Of Workplace Where Everyone Wants To Work

Inspiring Workplaces offer practical, relevant ideas on how to create healthier, more engaging and more productive workplace environments, delivered in a humorous and memorable style.

You will laugh as you learn:

- Choosing your workplace attitude before it chooses you;
- Why inspiring workplaces value their values;
- Dreaming of a better future: Why a compelling vision matters;
- Why (and how) inspiring workplaces put humour to work;
- Creating inspiring service to fellow employees or customers;
- Inspiring creative thinking in the workplace;
- Inspiring communication in the workplace: How we say things matters!
- Inspiring employees: the top motivating influences in any workplace;
- Thanks a lot! The importance of celebrating, recognizing and rewarding;
- Guiding lights for creating healthier, more inspiring workplaces.

EDUCATIONAL SESSIONS

2:00 pm - 3:00 pm

Session 102 | Shona Anderson, Anderson Ergonomics
Palomino "C"

REPETITIVE STRAIN INJURIES: An In-Depth Examination

An in-depth presentation on one of the leading causes of repetitive strain and back-related injuries. Our speaker will discuss risk factors and the ergonomic elements that can reduce

Session 102 - continued

the risks. It includes program elements to reduce pain including biomechanical and technique training, warm-up and stretching programs, with examples from municipal, railroad, driving and office environments. This session will help you identify key areas your safety program should be addressing to reduce accidents and injuries on your work site.

Session 103 | Glyn Jones, EHS Partnerships Ltd.
Palomino "D"

HAZARD VERSUS RISK? Knowing the Difference will Save a Life

The issue of hazard versus risk will be explored comparing what it means to assess and control hazards and what it means to assess and manage risk. A case-based approach will be used and examples of real-world hazards and risks will be introduced.

Session 104 | Chuck Samphire, Alberta Human Services
Palomino "E"

A VIEW FROM THE ENFORCEMENT SIDE: OH&S and the Construction Industry

This session will provide a review of OH&S enforcement activities and initiatives from the perspective of a current Manager and former Officer. It will provide a discussion of Occupational Health and Safety's inspection strategies and initiatives to improve compliance, and reduce work-related injuries and illnesses in the construction industry.

Topics to be covered will include:

- inspection statistics and types of orders written
- inspection strategies-updates on the OH&S Compliance Policy
- commercial/industrial construction and residential construction initiatives-inspections
- best practice development
- focused inspections
- data research
- external stakeholder involvement
- plans for hiring more officers

Session 105 | Davitt McAteer, West Virginia University College of Law
Palomino "F"

DISASTERS CAUSE CHANGE IN SAFETY LAWS

This presentation will present a historical overview of several mine disasters in the United States and their affect on Occupational Safety and Health Law. Our speaker, acknowledged worldwide as a leading authority in mine safety, will commence with the Monongah mine disaster in 1907 where almost 300 individuals were killed. He will discuss the mine disaster at Farmington which led to the Federal Coal Mine Health & Safety Act of 1969. Then he will address the Sunshine Mine fire in 1972 and the Scotia Coal mine disaster which led to the Federal Mine Safety & Health Act of 1977. He will discuss the Sago mine disaster and the Aracoma Alma mine fire where our speaker conducted investigations which led to the adoption of the Federal Mine Act of 2006. He will conclude the Upper Big Branch mine disaster of 2010 where he was again a lead investigator.

Unfortunately these mine disasters had to take place first before action was taken to create Occupational Safety and Health legislation to ensure workplaces for miners were safe.

COFFEE BREAK IN TRADE FAIR AREA

3:00 pm - 3:45 pm

EDUCATIONAL SESSIONS CONTINUED

3:45 pm - 4:45 pm

Session 106 | Steve Laughlin, CJ&K Training Services
Palomino "C"

ZOMBIE WALKERS: Are you working among the living dead??

The world is full of zombie walkers. You probably know or work with a few. These are the people that park in the exact parking spot every day. They have the same thing for lunch every day. When they get home from work, they don't actually remember driving. These are the same kind of employees that cause your OSHA recordable chart to look like the ascent of Everest. These are the ones walking through the facility with their safety glasses on their

Session #: 106 - continued

foreheads and their respirators around their neck. All this said, change is possible...but it requires change on your part first. You cannot continue to roll out the same safety programs, the same policies, the same posters, the same boring training programs and expect anything but what you continue to get. This seminar will demonstrate some creative programs, activities, incentives, and concepts that have been initiated by EH&S professionals from companies in a variety of industries throughout the country. We will also welcome any ideas that you may be able to bring to the seminar.

Session 107 | Kim Laing, St. John Ambulance
Palomino "D"

BUILDING AN EFFECTIVE HEALTH & SAFETY PLAN FOR YOUR ORGANIZATION

Even the most comprehensive and well-developed Safety Program becomes ineffective and inefficient if there isn't understanding, buy-in and empowerment. This session will explore and provide information on how to build and implement an effective health and safety plan for your organization.

Session 108 | Pat Ferris, Calgary Psychology Group
Palomino "E"

SAFETY IMPLICATIONS OF WORKPLACE BULLYING

In the past ten years, Occupational Health and Safety practices and legislation have come a long way, moving from a purely medical and environmental model of risk to one that includes psychosocial risks as well; and rightly so. The economic and business costs associated with these issues is huge and the safety implications are large. This presentation will examine the history of the identification of risks of exposure to workplace bullying. The presentation will then define the concept and examine how this type of stress impacts individuals at the brain chemistry, physical and psychological levels and how these processes then translate to safety risks. The presentation will discuss strategies to identify these risks in the workplace and how to implement controls.

Session 109 | Don Wilson, Calgary Fire Department
Palomino "F"

THE HUB OIL DISASTER

The Hub Oil Blast is considered one of the worst disasters in the City of Calgary. For nine hours after the initial explosion, fire raged throughout the site of the explosion being fuelled by oil, jet fuel, and propane. Two more major explosions were to follow after the first. All three could be heard clearly from the opposite side of Calgary. Many residents of the communities near the site dismissed the initial blast and resulting plume of smoke as a fire training exercise, as the Calgary Fire Department training facility was near by the blast site. Before it was over nearly 300 nearby residents had to be evacuated only to find their homes covered with globs of oil, dust and shrapnel from the blast site. Our speaker was the lead investigator in the investigation of the disaster. He will share with the attendees the findings of the investigation and reveal the changes made to the response programs for such disasters should they take place in the future. Our speaker is one of the best and should keep those in attendance on pins and needles as he shares his experiences at the blast site.

COFFEE BREAK IN TRADE FAIR AREA

8:00 am - 8:30 am

BLOCK BUSTER SESSIONS

8:30 am - 10:00 am

Session 201 | Mark Greene, Alberta Justice
Palomino "C"

PREVENTING WRONGS WITH RIGHTS: Balancing Human Rights with the Right to Health and Safety

Human Rights Legislation and Safety Legislation do not always work harmoniously together. When conflict occurs, one must be careful to achieve the safety objective with a minimal impact to fundamental human rights. This presentation will discuss the fundamentals of human rights law in relation to occupational health and safety programs and requirements including:

- Defining discrimination;
- Bona Fide Occupational Requirements;
- Duty to Accommodate;
- Undue Hardship; and
- Specific Topics affecting Health and Safety (including PPE and Religious Practices, Fitness to Work Requirements, and Drug and Alcohol Testing).

This presentation will also discuss strategies to assist you and your company in complying with the legislation.

Session 202 | Stephanie Benay, Bendex Safety Specialists
Palomino "E"

WHO IS REALLY RESPONSIBLE FOR SAFETY?

As Safety Professionals, many in our companies assume that we are the ones responsible for safety. We feel the employees are responsible. The law feels there is specific ownership of responsibilities. Do you even know who is?

Ms. Benay presents to her audience a simple question – who is responsible for safety and takes her audience through the steps in understanding accountability, responsibility and what that entails.

This presentation was a result of a heated discussion between OH&S lawyers, professionals and CEO's. Interactive and enlightening, Ms. Benay is a world-class presenter and the audience will be inspired to be a better professional, secure in the knowledge that they understand their roles.

COFFEE BREAK IN TRADE FAIR AREA

10:00 am - 10:30 am

EDUCATIONAL SESSIONS

10:30 am - 11:30 am

Session 203 | Mike Harnett, WorkSMART Injury Solutions
Palomino "C"

SHIFTWORK AND FATIGUE: Shattering Myths!

This workshop will deliver the most recent scientific research on the best way to maximize safety and performance while minimizing the effects of undue fatigue as they relate to shift work, on-call and overtime practices. Focus will include both organizational strategies as well as personal strategies. If you are involved in planning or working shift work, you need to see this session.

Session 204 | Blake McGowan, HumanTech, Inc.
Palomino "D"

ERGONOMICS AND THE AGING POPULATIONS: Risks & Design Guidelines

Most health and safety professionals are concerned with the ergonomics and the aging population. When asked why they are concerned, many express fears of anticipated increases in injury rates as their working population ages. However, data suggests that non-fatal occupational injury rates (sprains and strains) are higher for younger workers (≤ 25 years old) compared to the aging population (Jackson, 2001; Salminen, 2004). This is especially true for male populations. In reality, the two most important issues health and safety professionals should consider as the workforce ages are:

- Decreases in production performance: Older workers often require increased task completion time, which leads to decreases in production performance (Rahman et al., 2002).
- Increases in quality errors: Many older workers experience reduced hand sensitivity, which results in reduced tactile sensation and more product assembly errors (Ranganathan et al., 2001).

Currently, many organizations understand the positive impacts of ergonomics on productivity performance (for example, lean manufacturing). Organizations have repeatedly demonstrated task time improvements and ergonomic risk reductions following the implementation of engineering/ergonomic improvements. However, very few have launched ergonomic initiatives focused on reducing quality errors. Poor facility designs lead to quality issues, and Eklund (1999) showed that 60-70% of work-related musculoskeletal disorders (WMSDs) are related to poor design.

In this presentation, participants will learn how to identify ergonomic concerns using scientific tools, as well as ergonomic design guidelines to accommodate the aging population.

Session 205 | Rob Feagan, Alberta Human Services
Palomino "E"

PARTNERSHIPS NEWS!

Partnerships is a great example of how government, labour and industry can work together to improve occupational health and safety! We are a non-regulatory, province-wide prevention program sponsored cooperatively by government, labour, and industry. Together we encourage and assist employers with the implementation of health and safety management

continued....

systems at their work sites. Partnerships use a strategic approach to program development in an effort to meet the emerging needs of industry and government. Through this process, and consultation with stakeholders, feedback has been provided toward program direction. This session will provide an update and overview of Partnerships initiatives!

Session 206 | Randy Youngman, Alberta Transportation
Palomino “F”

EYES ON THE ROAD – Distracted Driving and Legislation

Distracted Driving occurs when someone diverts their attention from driving and focuses on an object, activity, event or person unrelated to the driving task. Driver distraction is a growing traffic safety concern among policy makers and the public. International studies have shown that 20 to 30 percent of collisions involve driver distraction. Alberta has taken a leadership role to address this serious traffic safety issue by recently passing Bill 16 - the Traffic Safety (Distracted Driving) Amendment Act, 2010 - to help make our roads safer. This law is fundamental to good driving practice and an important part of Alberta's overall strategy to take action on this dangerous trend. Safety is a choice. There are a number of integrated initiatives underway through the Alberta Traffic Safety Plan. Impacting collision frequency calls for ongoing coordinated activity by all traffic safety partners through strategic communication and education, community mobilization, targeted and strategic enforcement, and implementing engineering strategies – and of course, effective legislation.

LUNCH IN TRADE FAIR AREA

11:30 am - 1:00 pm

12:00 noon | CRSP Information Session
Quarterhorse “A”

How do you obtain your CRSP? That is a good question. For many years the Calgary Chapter of the CSSE has helped people to find their way through the maze of applications, study group participation and preparation courses. It can be confusing.

In this lunch-hour session we will explain the process that a person follows to go from “good intentioned ordinary health and safety citizen” to CRSP. We will discuss the application process, the structure and value of study groups and list and discuss all of the CRSP prep courses and other tools that are available to candidates to help them prepare. This drop-in session is open to registered delegates only.

KEYNOTE PANEL DISCUSSION

1:00 pm - 2:30 pm

Session 207 | If I Knew Then What I Know Now!
Hall “E”

IF I KNEW THEN WHAT I KNOW NOW!

Often events occur that fundamentally change the way we view the world and how we do things. While sometimes these events are tragedies in terms of loss of health or life, they have also been the catalyst for changing legislation and how we work. This session will explore how major workplace incidents changed how companies operate. Representatives from these companies will explore how these events changed corporate culture and workplace processes. Our four panelists will give a brief discussion on their experiences and then members from the audience will also be asked to share their experiences and what those experiences have taught them.

The panelists are:

[Dean Cowling, Vice-President, Community, Safety and Environment TransCanada](#)

Mr. Cowling's presentation will explore how a 3rd party pipeline incidents influenced the companies approach to pipeline safety awareness.

[Monica Field, Area Manager, Frank Slide Interpretive Centre](#)

Ms. Field will discuss Canada's Worst Mine Disaster. On June 19, 1914, 189 men died in an accident at the Hillcrest Mine in the Crownsnest Pass. 130 widows and 400 fatherless children were left without support. The company was not found to be at fault, but offered compensation. This catastrophe changed mine rescue practices, and launched workmen's compensation. Monica will discuss Canada's Worst Mine Disaster.

[Duane Mather, Chairman of the Board of Directors, Enform](#)

Mr. Mather will briefly discuss a “Then & Now” approach to five topics as they relate to a boots on the ground involvement to the Lodgepole blowout. Machinery & equipment, Environment, Regulations, People & Training and Safety.

[Dick Bisette, President, Bisette Resource Consultants Ltd.](#)

Mr. Bisette will discuss the Regulatory Changes Arising From The Lodgepole Blowouts.

COFFEE BREAK IN TRADE FAIR AREA

2:30 pm - 3:15 pm

EDUCATIONAL SESSIONS

3:15 pm - 4:15 pm

Session 208 | Doug Wylie, Winnipeg Air Testing

Palomino "C"

PROTECTING ALL WORKERS - Not Nearly All Workers

Airborne Exposure Guidelines, like the TLVs, are widely adopted and used by many safety and health professionals. This course explains how these guidelines are best applied in the real world. The strengths and limitations of the guidelines will be covered as well as a practical guide in the application of these guidelines aimed at the safety professional.

Session 209 | Martin Mudryk, Suncor Energy & Mike Doyle,

Palomino "C" Silverstar Well Servicing

IMPROVING SAFETY CULTURE ON THE RIG FLOOR: A Collaboration Between Producer & Contractor

The presentation will discuss how Suncor Energy In Situ Drilling & Completions and their contractor Silverstar Well Servicing collaborated together to improve the safety culture at their work sites over a two-year period. Attendees of this proposed presentation will take away engaging health & safety initiatives that have proven to be successful in the oil & gas industry. These simple but unique programs can be easily implemented on any work site and assist HS&E professionals in implementing solid leading indicator processes within their culture.

Session 210 | Melanie Walls, Human Factors, Safety and Usability

Palomino "E"

OVERLOAD – What is it and What can I do about it?

Overload is increasingly an issue in modern commercial settings. The economic downturn has led to reductions in staffing levels and to a situation where many individuals are attempting to fill job roles that were previously distributed between multiple employees. On a personal level, this can lead to stress and longer working hours. On a broader level, overload may be impacting safety and performance throughout the organization. This training course will provide attendees with a starting point to begin addressing overload within their organizations and their own working lives, to ensure it is managed safely and effectively.

Session 211 | Cliff O'Brien, John Petropoulos Memorial Fund

Palomino "F"

The John Petropoulos Fatality

This presentation will address the fatality of John Petropoulos who was killed while performing his duties on September 29th, 2000 in Calgary.

The investigation into this incident resulted in a number of changes when it came to Workplace Safety for Police Officers and First Responders. The speaker will outline the findings of the investigation and the affects it had on the City of Calgary Police Services Department Safety program

TRADE FAIR VIEWING

4:15 pm - 5:00 pm

4:30 pm | **ANNUAL GENERAL MEETING** **Quarterhorse "A"**

Canadian Society Of Safety Engineering

Alberta, NWT & Nunavut Region

The Alberta, NWT and Nunavut Region of the CSSE invites their members to join them at their Annual General Meeting being held at 4:30 pm in Quarterhorse "A". (open to everyone)

COFFEE IN TRADE FAIR AREA

8:00 am - 8:30 am

KEYNOTE SESSION

8:30 am - 9:45 am

Session 301 | Don Lowry, EPCOR

Hall "E"

SAFETY - Setting the Tone at the Top

There is nothing more important at EPCOR than the safety of its people. The company is focused on building a culture that supports a workplace free of occupational injury and illness. To do this, the tone is set at the top. EPCOR's President and CEO Don Lowry established the President's Safety Council in 2010 as a monthly forum where line managers and executives meet to share safety results and learnings, highlight successes, and identify areas of improvement. This is one of a number of initiatives underway at EPCOR to create a work culture that places safety first.

COFFEE IN TRADE FAIR AREA

9:45 am - 10:30 am

BLOCKBUSTER SESSIONS

10:30 am - 12:00 noon

Session 302 | Shilo Neveu, McLennan Ross

Palomino "C"

THE ANATOMY OF AN ACCIDENT: A Legal Perspective

There are a lot of judges talking and telling us what to do, but what are they really telling us?

This presentation will focus on recent and not so recent case law and what the courts have told us about our accident investigations - What to do, how to do it and what to look for. Throughout this presentation I will also identify common pitfalls during an accident investigations.

Session 303 | Valerie Cade, The Performance Curve

Palomino "E"

THE WORKPLACE BULLYING EPIDEMIC: What You Can Do To Stop It Now! *"I Know What It Looks Like...Tell Me How To Fix It!"*

Why do safety professionals need awareness on how to stop Workplace Bullying?

Reason: At least 1 out of 6 people have reported being bullied at work. That's nearly 20%.

Reason: This 'silent cyanide' causes employees and managers to withdraw and lose valuable momentum. Many are left confused, less productive, your great employees start to leave, and worse yet safety incidences escalate.

This session is for you if you:

- Have employees coming to you asking you to solve complex conflict situations that you are not empowered to handle.
- Feel overwhelmed because you'd like to help but you are not sure how (without taking all your available energy)!
- You are feeling drained by the 'politics' and you are not sure how to start or what to do; bottom line, you're wanting a change!

You will leave with:

- A clear understanding of how to identify workplace bullying situations and 'difficult situations'.
- 2-3 key resolution strategies safety professionals can use with most employee situations.
- An renewed sense of hope as an safety professional; after all, who encourages you?

EDUCATIONAL SESSIONS

12:15 pm - 1:15 pm

Session 304 | Neil Jubinville, Safebook Industrial & Orbital Software
Palomino "C" Solutions Inc.

SOCIAL MEDIA & MOBILE TECHNOLOGIES TO SAFETY

Technology is leading the world into new levels of connectivity, this presentation will educate you on new technologies in the world of safety. In this presentation you will learn real world benefits and applications of the following:

- Social Media Technology - How and why should I apply social networking in my safety world?
- Mobile Technology - What do mobile technologies have to offer and how can they improve my work flow?
- Safety Consciousness - How can these technologies be combined to influence and create safety culture?

New research and developments are leading the world of safety into unlimited possibilities. Now is your chance to be informed on the latest trends and the advantages driving them forward.

Session 305 | Bruce Burrell, Calgary Fire Department
Palomino "D"

HEALTH & SAFETY FOR THE FIRST RESPONDER AND HOW IT AFFECTS THE GENERAL PUBLIC

The Firefighters occupation is considered one of the most dangerous in the workplace. Routinely the dangerous situations they respond to are life threatening and sometimes actually do result in death.

This presentation addresses the hazards of a firefighter and the resulting H & S program that the Calgary Fire Department has for its members. It will not only provide an overview of the H & S training firefighters receive but it will also explain how their program affects the general public.

Session 306 | Steven Quantz, Alberta Health Services &
Palomino "E" Elliott Irwin, Alberta Construction Safety Association

OUTDOOR WORKERS AND SKIN CANCER

Skin cancer is the most common cancer in Alberta, with solar ultraviolet radiation exposure being the principal cause and primary preventable risk factor. Outdoor workers experience a substantial amount of sun exposure on a daily basis due to the nature of their occupation, and are consequently a vulnerable population group due to their increased risk.

The Outdoor Workers Skin Cancer Prevention Project aims to collaborate with key stakeholders to develop a comprehensive provincial strategy to reduce skin cancer incidence among outdoor workers in Alberta by utilizing supporting evidence to identify priority areas and work settings.

The project's major components will be the integration of the strategy into employers' standard operating procedures and through specific intervention(s) aimed at changing knowledge, attitudes and behaviors. The long term goal of this project is to reduce the proportion of workers exposed to solar radiation, ultimately leading to reduced rates of skin cancer.

Session 307 | **THE TRIANGLE FIRE** | A documentary film
Palomino "F"

The fire that tore through the Triangle Shirtwaist Factory in New York City on March 25, 1911, was the gruesome culmination of years of unrest in America's most profitable manufacturing industry. Two years earlier, led by a spontaneous walkout in the same factory, twenty thousand garment workers, in the largest women's strike in American history, took to the streets of New York to protest working conditions. They gained the support of both progressives and leading women in New York's high society. But it took the tragedy at the Triangle Shirtwaist Factory, the death of one hundred and forty-eight young women and the ensuing national outrage, to force government action.

From producer Jamila Wignot (Walt Whitman, Jesse James, The Massie Affair) comes Triangle Fire (wt), a one-hour film chronicling the tragedy that shook New York and forever changed the relationship between labor and industry in the United States. And it is a relationship that is still in question today as Americans re-examine the balance between the welfare of citizens and the motivations of global capitalism. Produced by Jamila Wignot.

SIT DOWN LUNCHEON WITH CLINT DUNFORD

1:15 pm - 2:15 pm
Hall “E”

The development and implementation of the “Alberta Worksafe Program” created optimism and concern within Alberta industry with all kinds of groups picking sides. But what about the “politics” of the program? Clint will detail some of the battles that went on at the Legislature Building as competing interests attempted to influence the initiative and, in fact, prevent it ever seeing the light of day. There was more at stake than a relatively simple methodology for reducing injuries in the workplace. Enough time has passed by and a significant change to personnel has occurred whereby we can talk more openly about some of the things that actually happened. This is not an expose but should be revealing about the interplay of special interest groups and the motivations of government.

CLOSING KEYNOTE

2:15 pm - 3:30 pm

Session 308 | Dr. Kenford Nedd, International Stress Control Center
Hall “E”

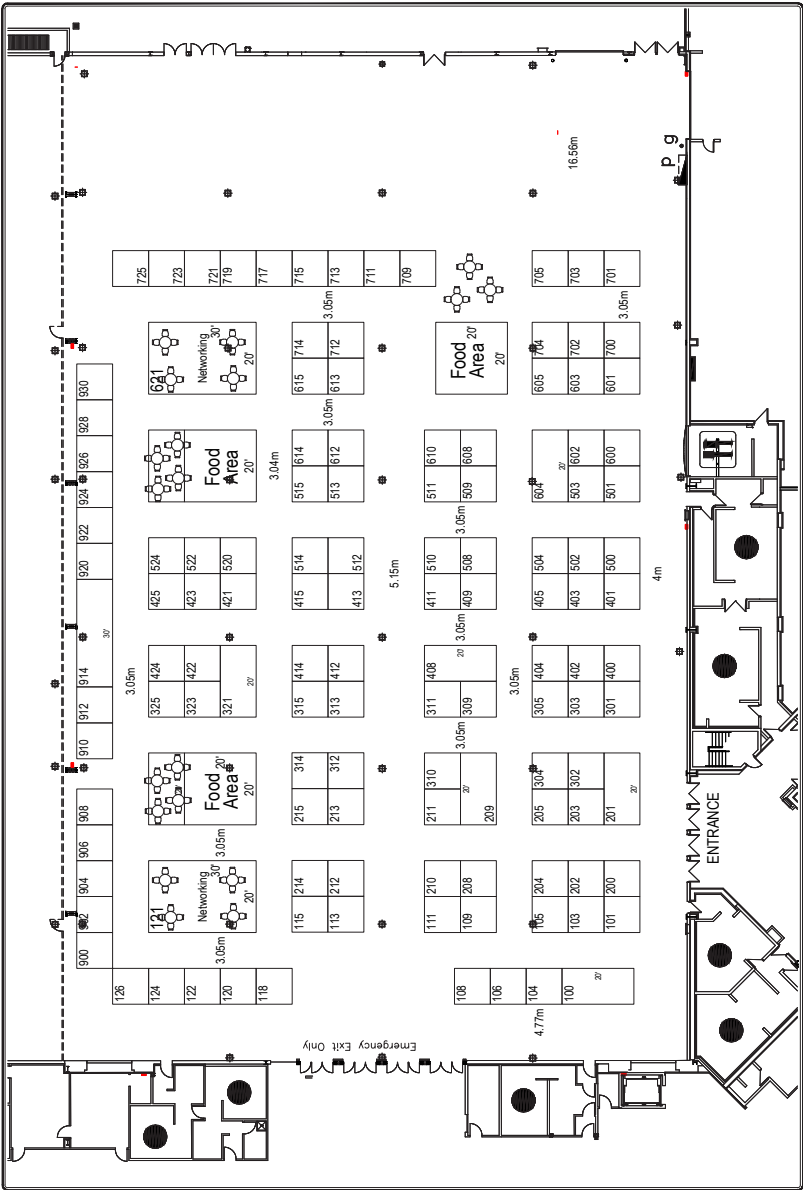

PRESCRIPTION FOR PRESSURE

As Health & Safety professionals you are constantly under pressure to create a healthy, stress-free, high performance environment. As you are constantly on guard to defend against disaster, your physiology can do with some upgrading. Come laugh and learn as we establish 7 practical techniques that you can use to thrive under pressure and create mental toughness, a superior body and mind and greater happiness in all areas of your life.

Bring your completed Conference Evaluation Form
to the Closing Ceremonies and be entered for the

GRAND PRIZE DRAW

sponsored by **Christensen & McLean Roofing Co.**

| talentClick Employee Assessments 200, 625 Howe Street Vancouver British Columbia V6C 2T6 (604) 682-9999 www.talent-click.com | Research shows that up to 90% of accidents involve human error. Safety training and safe equipment can help employees; but without insight into how individuals contribute to safety, even the most extensive H&S program can have limited success. TalentClick is a Vancouver based industrial psychology firm with an employee personality test specialized for safety. The Safety Risk assessment helps identify "high risk" personalities who are Reckless vs. Cautious, Distractible vs. Vigilant, Arrogant vs. Trainable, and so on. It is being used by large corporations in oil & gas, mining, chemicals, manufacturing, transportation, construction, health care, and more. Organizations use the report for screening out workers at the hiring stage, and also for identifying safety training needs with an existing workforce. Actual case study results include: 52% reduction in lost-time injuries, 40% decrease in rule violations, 40% decrease in workers compensation claims, and more. Booth 401 |

Fun Run and Walk

Thanks...

to all of those who participated in the 2nd Annual Fun Run & Walk.

Proceeds will be donated to Threads of Life, an organization whose mission is to help families heal through a community of support and promote the elimination of life-altering workplace injuries, illnesses and deaths.

sponsored by

PHOTO RELEASE

Please note that by entering the educational sessions or trade fair, you give the Health and Safety Conference Society of Alberta (HSCSA) permission to use photos taken of you participating in the Health and Safety Conference or Trade Fair, for the purpose of promoting the conference. Some photos may be close-ups and others may be from a distance. Promotion of the tradeshow may include brochures, posters, the HSCSA website and other media.

If you do not want your photo included in any of the Conference's promotional material, please request that the photographer delete the particular photo immediately. Otherwise, it is implied that you do give permission for your photo to be used to promote the HSCSA conference.

The organizers of this year's Conference and Trade Fair wish all participants a pleasant stay in Calgary and hope that everyone will return home with lots of new, interesting and valuable information gained during the event.

Alberta Health & Safety Conference 2012

Shaw Conference Centre
Edmonton, Alberta

November 19 - 21, 2012

Safety through the generations

Next year's conference theme will encompass aging workers, the split of work ethic, ideas, generations between young and old workers within companies, the pass-off of jobs from the older generation to the younger one, and more.

For general information please e-mail:
info@hsconference.com

For Trade Fair information please e-mail:
